Beth St. Jean is a doctoral student in the School of Information at the University of Michigan and a Graduate Student Research Assistant for the IMLS-funded MIRACLE (Making Institutional Repositories A Collaborative Learning Environment) project. She holds a Bachelor's Degree in Mathematics from Smith College and a Master's Degree in Information from the University of Michigan. Her research interests include consumer health information behavior, credibility assessment, information literacy, institutional repositories, and relevance.

Soo Young Rieh is an associate professor in the School of Information (SI) at the University of Michigan. Her research seeks to better understand people's interactions with information in various contexts such as the web, libraries, and institutional repositories. She is particularly interested in credibility and cognitive authority judgments in the information seeking process. She is the principal investigator of the MIRACLE (Making Institutional Repositories A Collaborative Learning Environment) Project funded by the Institute of Museum and Library Services (IMLS). Her research goals in the MIRACLE Project are to identify success factors in institutional repositories from multiple perspectives including administration, service, and use.

Elizabeth Yakel is an associate professor in the School of Information at the University of Michigan where she teaches in the Archives and Records Management and Preservation of Information specializations. Her research interests include access to digital archives and manuscripts and user evaluation and she has published widely in such publications as *American Archivist*, *Archivaria*, and *Archival Science*. She has received funding from the Andrew W. Mellon Foundation, the National Historical Publications and Records Commission, and OCLC.

Karen Markey is a professor in the School of Information at the University of Michigan. Prior to joining Michigan's faculty in 1987, she was a Senior Research Scientist at the OCLC Online Computer Library Center. Her research has been supported by the Council on Library Resources, Delmas Foundation, Department of Education, Institute of Museum and Library Studies, National Science Foundation, and OCLC, and focuses on improving online information systems so that the everyday people who search them find the information they want.

Raya Samet is a Master's student in the School of Information at the University of Michigan, and a student research assistant for the IMLS-funded MIRACLE (Making Institutional Repositories A Collaborative Learning Environment) project. She holds a Bachelor's Degree in Middle East and North African Studies from the University of Michigan. Her current focus is K-12 School Media, and she is interested in the potential for collaborative learning environments to increase access to high-quality information for students of all ages.
