

Abe Lederman has 25 years of experience in computer software engineering. He began his career with Hewlett Packard and was then recruited to become a founding member of Verity, a startup pioneer in the field of search engine technology. In 1994, Abe left Verity and later founded Innovative Web Applications (IWA), a software consulting firm primarily serving Los Alamos National Laboratory (LANL). While consulting with LANL and the U.S. Department of Energy's Office of Scientific and Technical Information (OSTI), Abe came to realize the enormous potential for federated search technology to accelerate the diffusion of knowledge. He founded Deep Web Technologies in 2002. Abe holds Bachelor of Science and Master of Science degrees in Computer Science from the Massachusetts Institute of Technology.
